STATE ELECTRIC
SUPPLY COMPANY
CUSTOMER FOCUSED • QUALITY DRIVEN

Answer:

If you do, electrical outlets can be dangerous if kids insert anything into the wall outlet. We can provide tamper-resistant, child-proof receptacles that are designed with receptacle doors that block the power outlet slots when not in use. In addition, we have available Arc Fault Circuit Interrupters (AFCI) for the bedrooms to reduce the risk of fire.

It can also be dangerous when children need to use the bathroom at night. We can provide wall-mounted infrared occupancy sensors that automatically turn lights on in hallways and bathrooms.
