

A bedroom scene featuring a bed with a white headboard, brown pillows, and a white blanket. A lamp with a white shade is on a nightstand. A coffee table with a white plate and a glass of water is in the foreground. A large, glowing compact fluorescent light bulb is in the bottom right corner.

Q.

DOES YOUR HOME HAVE ENERGY-EFFICIENT  
FLUORESCENT LIGHTING FOR CEILING AND  
WALL-MOUNTED FIXTURES?

[WWW.STATEELECTRICLIGHTING.COM](http://WWW.STATEELECTRICLIGHTING.COM)

STATE ELECTRIC  
SUPPLY COMPANY

CUSTOMER FOCUSED, QUALITY DRIVEN

# *Answer:*

If not, we can replace existing incandescent lighting units with new energy-efficient fluorescent light fixtures that will greatly reduce your electrical consumption in high-demand areas, like the kitchen, living room or home office.

By installing new energy-efficient compact fluorescent light fixtures and bulbs, you will reduce your electrical consumption for the life of the house.
